Safety Performance Management

Target Setting

Data: Fatalities and Serious Injuries

David Adams
Georgia DOT
Executive Summary

- Purpose of the Regulatory Action is to clarify the Moving Ahead for Progress in the 21st Century Act (MAP-21) (Pub. L. 112-141) and the Fixing America's Surface Transportation Act (FAST Act) (Pub. L. 114-94) continue the Highway Safety Improvement Program (HSIP) under section 148, title 23 of the United States Code (U.S.C.) as a core Federal-aid program with the purpose to achieve a significant reduction in fatalities and serious injuries on all public roads.
Final Rule

- The purpose of this final rule is to incorporate changes to the Highway Safety Improvement Program (HSIP) regulations to address provisions in the Moving Ahead for Progress in the 21st Century Act (MAP-21) as well as to incorporate clarifications to better explain existing regulatory language. The DOT also considered the HSIP provisions in the Fixing America's Surface Transportation Act (FAST Act)

- Effective April 14, 2016
Safety Performance Measures

- Number of Fatalities
- Rate of Fatalities per 100 million Vehicle Miles Traveled (VMT)
- Number of Serious Injuries
- Rate of Serious Injury per 100 Vehicle Miles Traveled (VMT)
- Number of Non-Motorized Fatalities and Serious Injuries
- Using a Unweighted Rolling Five(5) Year Average
Strategic Highway Safety Plan

- Highway Safety Plan

CODES Linked Data

GEORGIA UNIFORM VEHICLE ACCIDENT REPORT

- Serious Injury
- Any injury that prevents the injured person from walking, driving, or normally continuing the activities that, that person was capable of performing prior to the accident.

CRASH VARIABLES

- Transport
- Vehicle Damage
- Vehicle Type
- Person Type
- Injury Class Code
MMUCC 4th Ed. Suspected Serious Injury Definition

- Severe laceration resulting in exposure of underlying tissues/muscle/organs or resulting in significant loss of blood
- Broken or distorted extremity (arm or leg)
- Crush injuries
- Suspected skull, chest, or abdominal injury other than
- Significant burns (second and third degree burns over 10% or more of the body)
- Unconsciousness when taken from the crash scene
- Paralysis
Serious Traffic-related Injuries Definition

- All pedestrian and bicycle occupants that were coded as serious
- All pedestrian and bicycle occupants that were coded as visible and was transport by EMS
- All other occupants that were coded as serious and transport by EMS
- 50% of all other occupants that were coded visible, transport by EMS, and damage to vehicle (extensive or fire present)

MPO Targets

MPOs will establish targets for the same five safety performance measures for all public roads in the MPO planning area within **180 days** after the State establishes each target. The targets will be established in coordination with the State, to the maximum extent practicable. **The MPO can either agree to support the State DOT target or establish a numerical target specific to the MPO planning area.** MPOs' targets are reported to the State DOT, which must be able to provide the targets to FHWA, upon request.
